

# VERSATECH

## SERIES

V-100N

V-140N

**Mazak**

## Advanced features of the MAZATROL SmoothX CNC

Touch screen operation similar to your smartphone/tablet

PC with Windows® 8 embedded OS

Fastest CNC in the world with latest hardware and software for unprecedented speed and precision

High-precision machining of complex contours at high-speed feedrates

Easy conversational programming of multiple-surface machining

Smooth graphical user interface and support functions for unsurpassed ease of operations

MTConnect® ready for convenient networking

Easily configure machine parameters for different workpiece materials and application requirements

Windows is a registered trademark of Microsoft Corporation in the United States and other countries.

MTConnect is a registered trademark of AMT in the United States and other countries.

# MAZATROL SMOOTHX

Machine very large workpieces  
with unsurpassed versatility

## VERSATECH SERIES V-100N/V-140N

- Machine multiple surfaces in just one workpiece setup
- High-speed feedrate for X and Y axis
- Specifications available to meet a wide range of production requirements

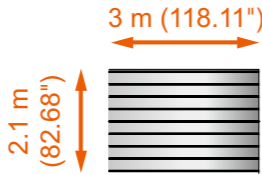

VERSATECH V-140N 280 shown with optional cover and cameras

# Higher Productivity

Large workpiece capacity thanks to a machine table length up to 10 m (393.7")

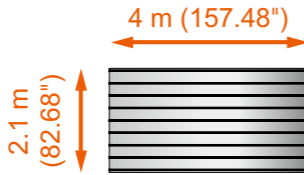

## VERSATECH V-100N 160

Table size: 2100 mm x 3000 mm (82.68" x 118.11")  
Table load capacity: 43000 kg (94797 lbs)

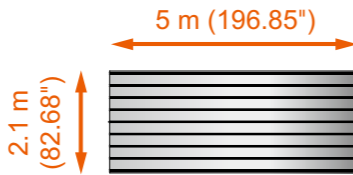

## VERSATECH V-100N 200

Table size: 2100 mm x 4000 mm (82.68" x 157.48")  
Table load capacity: 43000 kg (94797 lbs)

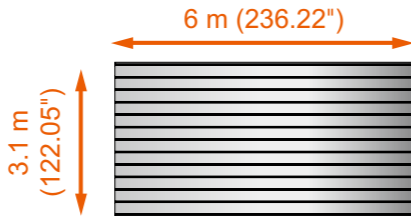

## VERSATECH V-100N 240

Table size: 2100 mm x 5000 mm (82.68" x 196.85")  
Table load capacity: 43000 kg (94797 lbs)

## VERSATECH V-140N 280

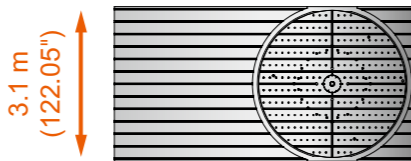

Table size: 3100 mm x 6000 mm (122.05" x 236.22")  
Table load capacity: 43000 kg (94797 lbs)

### Turning table specifications

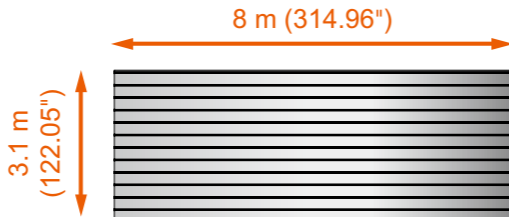

OPTION

Table size:  $\varnothing 2950$  mm (116.14")  
Maximum workpiece size:  $\varnothing 3500$  mm x 1750 mm (137.80" x 68.90")

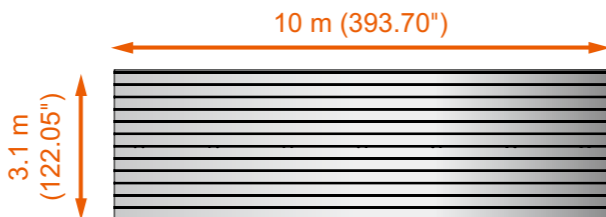

## VERSATECH V-140N 360

Table size: 3100 mm x 8000 mm (122.05" x 314.96")  
Table load capacity: 43000 kg (94797 lbs)

## VERSATECH V-140N 440

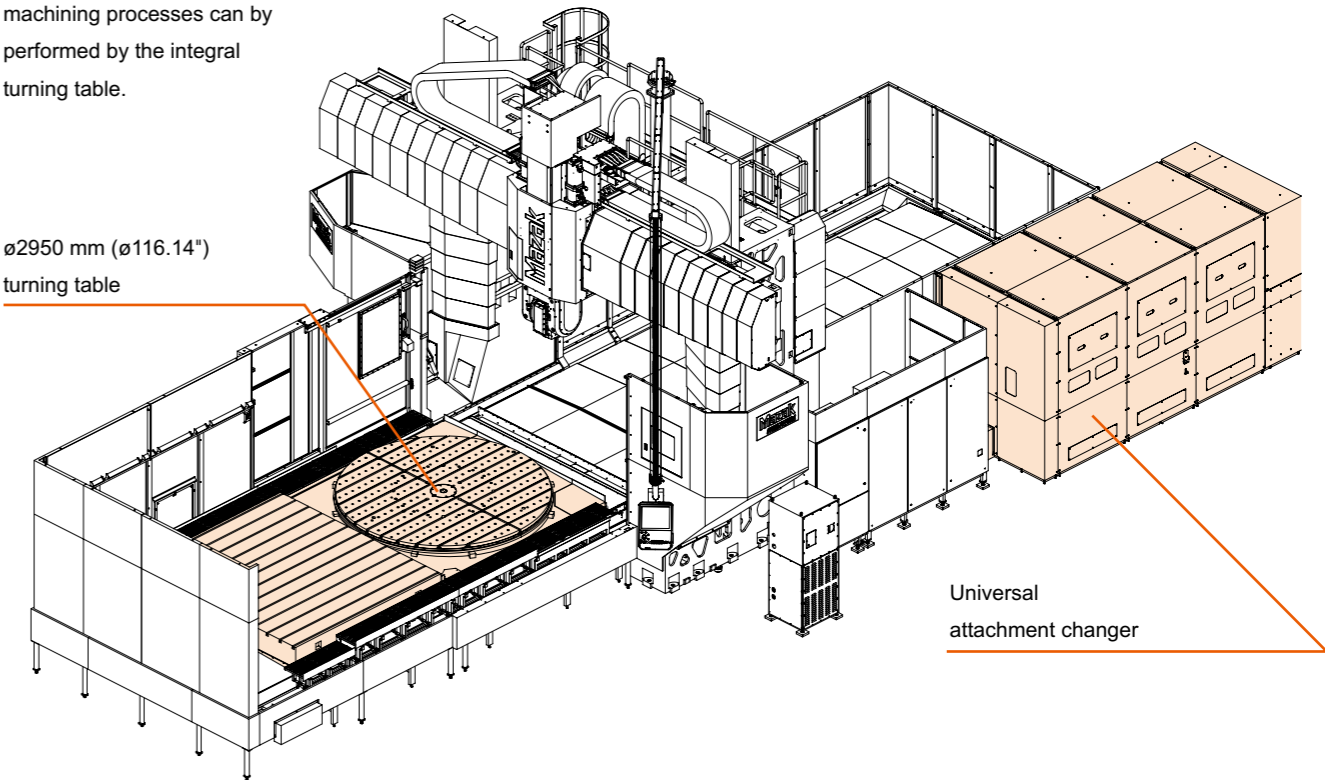

Table size: 3100 mm x 10000 mm (122.05" x 393.70")  
Table load capacity: 43000 kg (94797 lbs)

V-140N with turning table

OPTION

A wide variety of large workpiece machining processes can be performed by the integral turning table.

Turning attachment

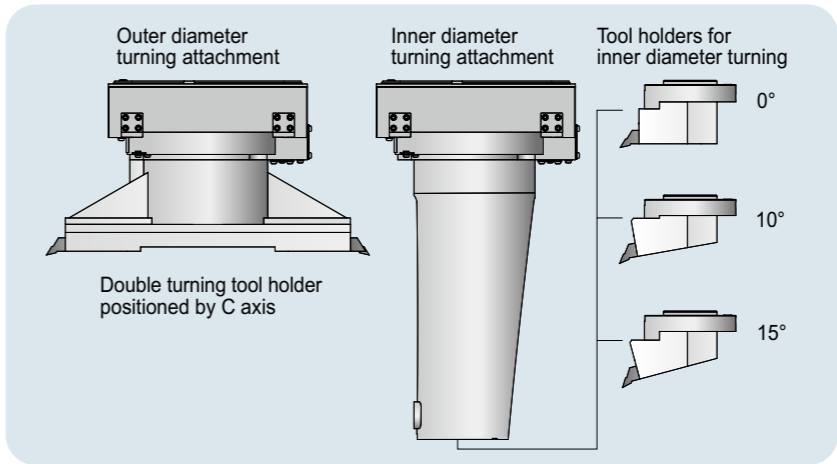

OPTION

Optional inner-diameter and outer-diameter turning attachments are available for increased versatility. The attachments have a coolant-through-spindle system for the machining of difficult-to-cut material. The attachments can be changed automatically by the universal attachment changer.

Universal attachment changer

OPTION

The attachments are stored in the stocker outside of the machining area. The number of attachments that can be stored ranges from 1, 2, 4 and 6. This number can be increased after the initial installation.

Higher Productivity

Simultaneous 5 axis machining specification

OPTION

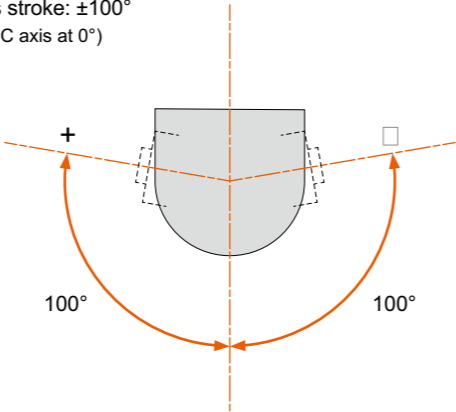

Because the VERSATECH does not require a head changer thanks to its B and C axes, non-cutting time is greatly reduced. The simultaneous 5-axis machining specification is available optionally for the machining of complex surfaces such as those found in components for the die and mold and aerospace industries.

B, C axis specification (Optional simultaneous 5 axis)

B axis	Stroke	±100°
	Rapid traverse rate	21600°/min
	Max. torque	1500 N • m (1106 ft • lbs)
	Continuous torque	630 N • m (465 ft • lbs)
	Stall torque	520 N • m (384 ft • lbs)
C axis	Stroke	Unlimited
	Rapid traverse rate	21600°/min
	Max. torque	3000 N • m (2213 ft • lbs)
	Continuous torque	800 N • m (590 ft • lbs)
	Stall torque	660 N • m (487 ft • lbs)

\*Rapid traverse rate is 5400°/min when attachment is mounted

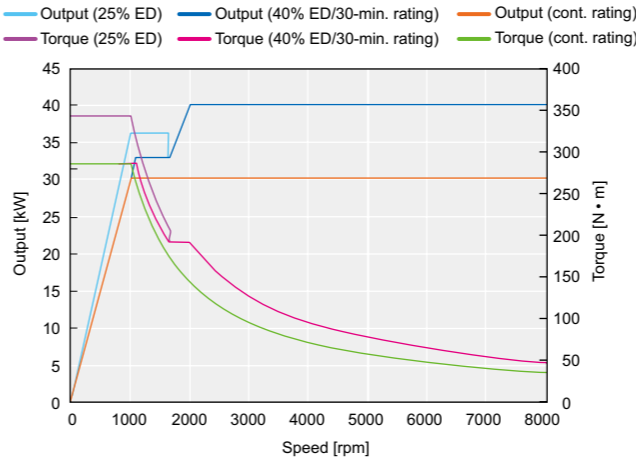

B axis stroke: ±100°  
(when C axis at 0°)

Selectable 8000 rpm and 12000 rpm spindle specification

8000 rpm spindle

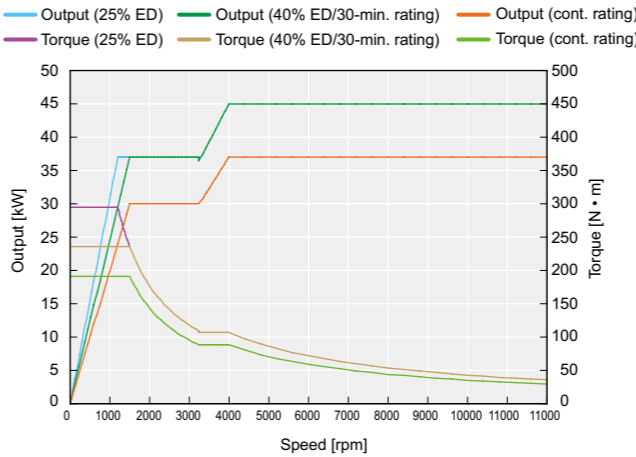

No. 50 taper 8000 rpm, 40 kW (54 HP) (40% ED/30-min. rating) spindle, maximum torque 334 NĐm (254 ft • lbs) for the machining of steel workpieces.

12000 rpm high-speed spindle

A 12000 rpm spindle with output of 45 kW (60 HP) (40% ED) is available for aluminum machining.

12000 rpm spindle output and torque diagram

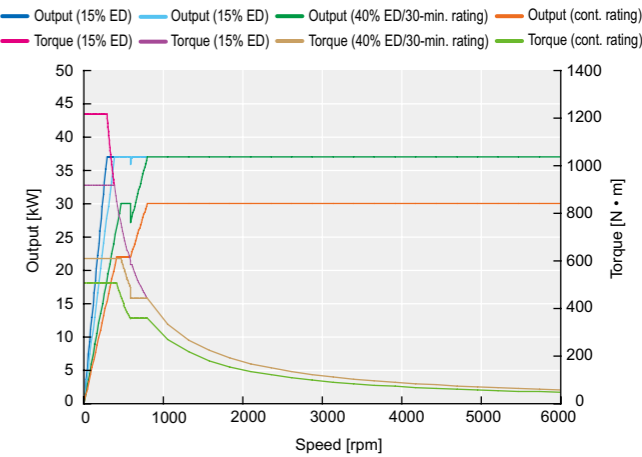

Note: Spindle is 155 mm longer than 8000 rpm spindle, which limits stroke. Universal attachment is not available.

6000 rpm high-torque spindle

OPTION

A 6000 rpm spindle with maximum torque of 1218 N • m (898 ft • lbs) is optionally available for heavy-duty machining.

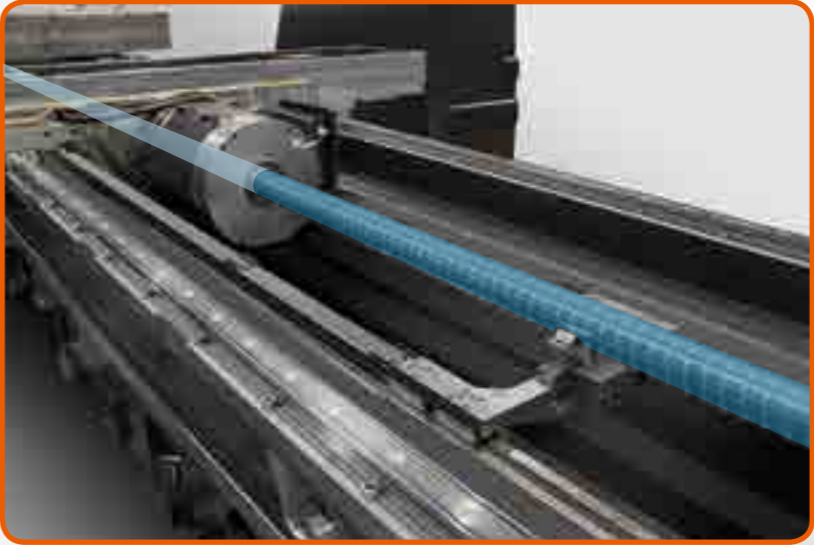

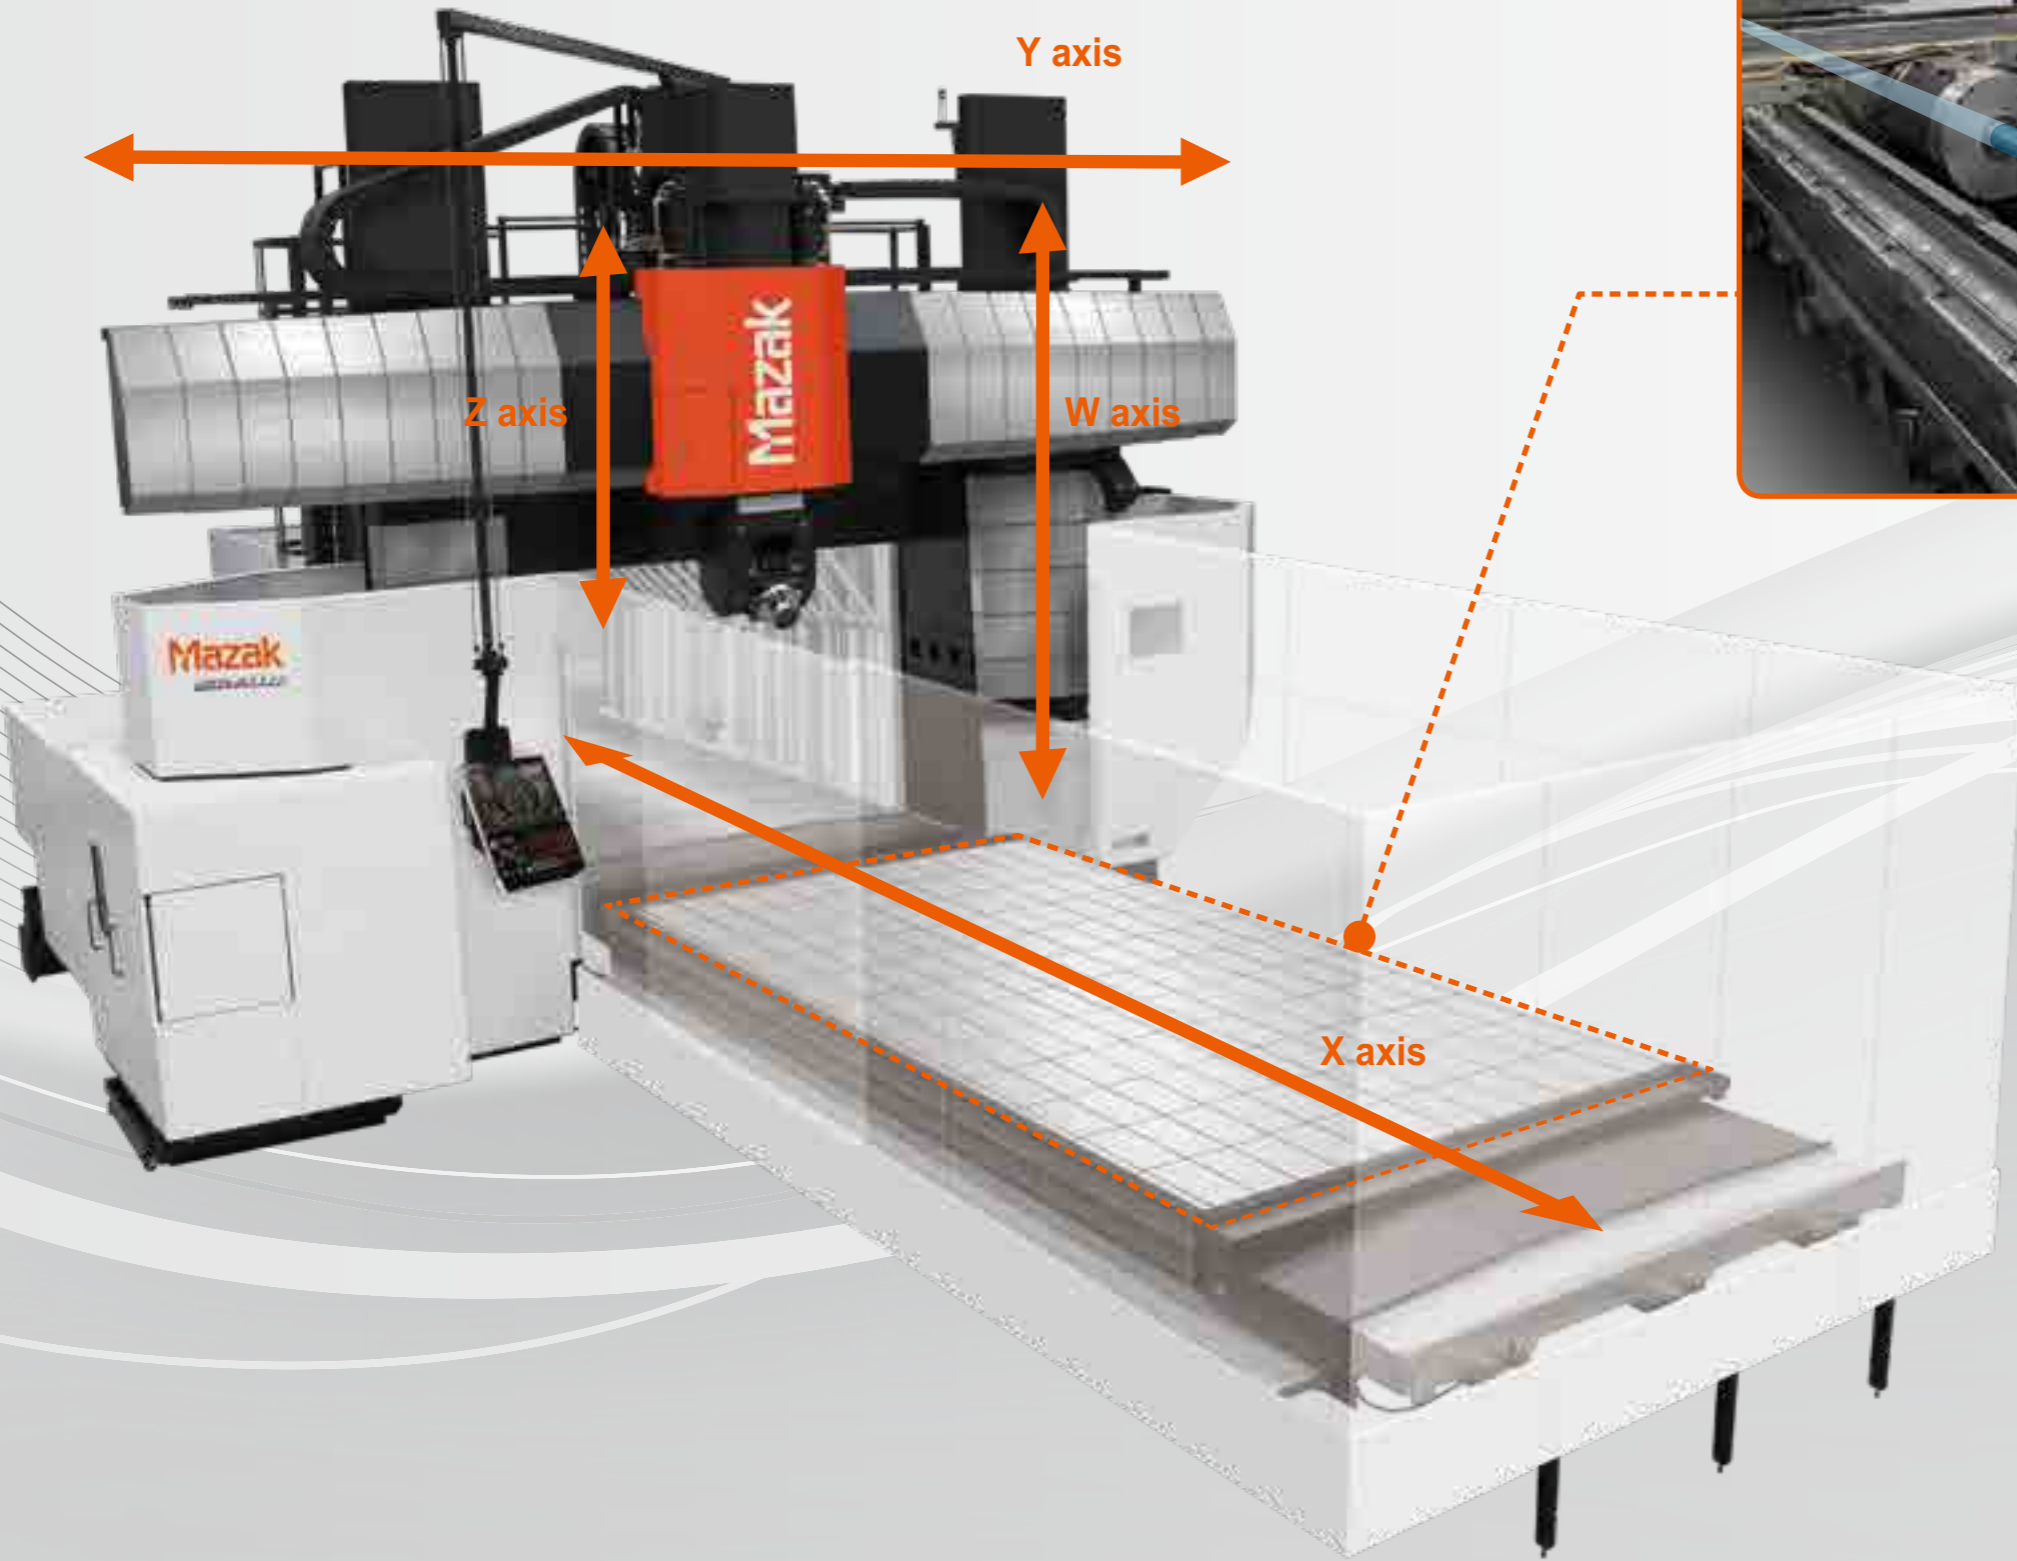

6000 rpm spindle output and torque diagram

Note: Spindle is 135 mm longer than 8000 rpm spindle, which limits stroke.

# Higher Productivity

High-speed, high-accuracy X, Y, Z axis feed system

## High-speed

The maximum feedrate of the X and Y axes is 30 m/min (1181 IPM) thanks to the stationary ballscrew.

\*Rapid traverse rate (X axis) for V-140N 360, V-140N 440 is 15 m/min (591 IPM).

## High-accuracy

Temperature-controlled cooling oil circulates through the ballscrew cores to ensure stable machining accuracy over extended periods of high-speed operation.

Machine	VERSATECH V-100N			VERSATECH V-140N		
	160	200	240	280	360	440
Stroke	X axis	4000 mm (157.48")	5000 mm (196.85")	6000 mm (236.22")	7000 mm (275.59")	9000 mm (354.33")
	Y axis	3600 mm (141.73")			4600 mm (181.1")	
	Z axis	710 mm (27.95")			710 mm (27.95")	
	W axis	1250 mm (49.21")			1250 mm (49.21")	
Table size	2.1 m x 3 m (82.68" x 118.11")	2.1 m x 4 m (82.68" x 157.48")	2.1 m x 5 m (82.68" x 196.85")	3.1 m x 6 m (122.05" x 236.22")	3.1 m x 8 m (122.05" x 314.96")	3.1 m x 10 m (122.05" x 393.7")
Max. table loading capacity	43000 kg (94797 lbs)*			43000 kg (94797 lbs)*		

\*2 table changer: 28000 kg (61728 lbs)

## Volumetric compensation OPTION

This function uses a laser tracer to obtain measurement position errors (linear, pitch, yaw, roll, etc.) and input them into the CNC to compensate error in the entire machining envelope.

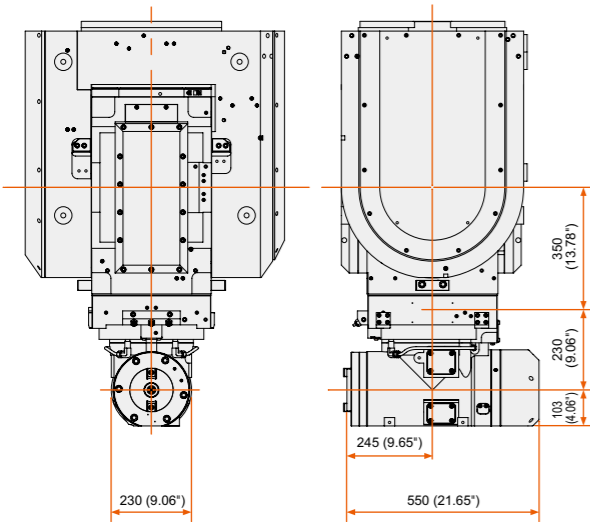

# Factory Automation

Attachments designed for increased versatility and less interference

## Angle attachment OPTION

- Machines areas that the standard spingle cannot reach.
- Tools from the magazine are changed automatically like the tools for the standard spindle.
- In addition to flood coolant, the coolant through spindle system is an available option.

### Dimensions Unit: mm (inch)

### Dimensions

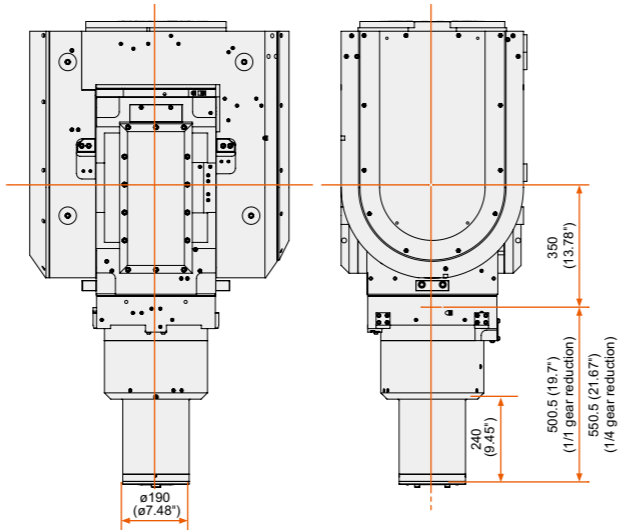

Spindle taper	No. 50
Spindle speed	50 ~ 1500 rpm
Gear reduction	1/2
Spindle bearing ID	100 mm (3.94")
Max. tool diameter	ø125 mm (ø4.92")
Max. tool diameter (adjacent pockets empty)	ø210 mm (ø8.27")
Max. tool diameter (from gauge line)	500 mm (19.69")
Max. tool weight	15 kg (33 lbs)

Angle/snout attachment is available only for the 8000 rpm spindle.

## Snout attachment OPTION

- Can perform deep boring that the standard spindle cannot do.
- Tools from the magazine are changed automatically like the tools for the standard spindle.
- In addition to flood coolant, the coolant through spindle system is an available option.

### Dimensions Unit: mm (inch)

### Dimensions

Spindle taper	No. 50
Spindle speed	50 ~ 1500 rpm (1/4) 50 ~ 5000 rpm (1/1)
Gear reduction	1/4, 1/1
Spindle bearing ID	100 mm (3.94")
Max. tool diameter	ø125 mm (ø4.92")
Max. tool diameter (adjacent pockets empty)	ø210 mm (ø8.27")
Max. tool diameter (from gauge line)	500 mm (19.69")
Max. tool weight	15 kg (33 lbs)

## PALLETECH MANUFACTURING CELL

The VERSATECH can be integrated into a PALLETECH SYSTEM designed with the flexibility required for shorter product life cycles, reduced in-process inventory, just-in-time production and other demands of today's manufacturing environment. Additionally, the production schedule can be set or edited easily by inputting the pallet work flow into the scheduler software of the FMS computer.

	Minimum	Maximum
Machine(s)	1	16
Number of pallets	6	240
Loading station(s)	1	8
Loading robot	1	1

# Higher Productivity & Higher Accuracy

## SMOOTH MACHINING CONFIGURATION

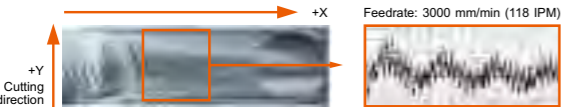

Machining features including cycle time, finished surface and machining shape can be adjusted by slider switches on the display according to material requirements and machining methods. This is especially effective for complex workpiece contours defined in small program increments. Once the desired results are obtained, the settings can be stored in memory so they can be used again easily in the future.

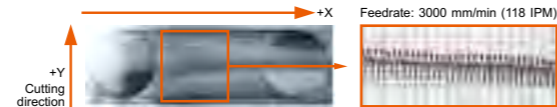

## ACTIVE VIBRATION CONTROL

Minimized vibration function for high-speed, high-accuracy machining and longer tool life

### Other Systems

### ACTIVE VIBRATION CONTROL

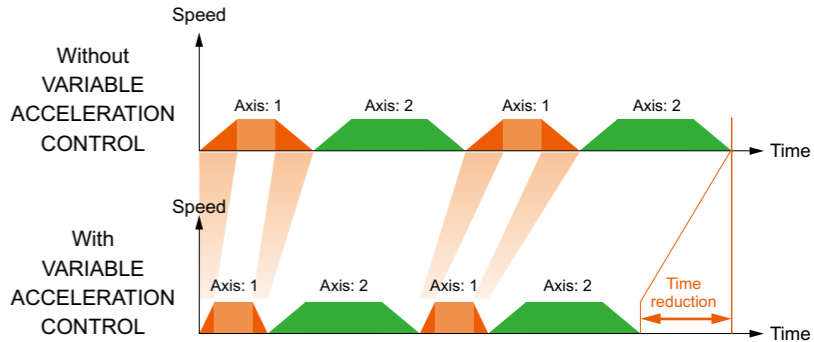

**Machining time for an aluminum impeller was reduced approximately 10-20% by using this function**  
(test results for reference only)

## VARIABLE ACCELERATION CONTROL

VARIABLE ACCELERATION CONTROL is a new function that permits the faster acceleration capability of linear axes to be used whenever possible. The slower acceleration of the rotary axes is not used for all program commands, resulting in faster machining cycle times.

## SMOOTH CORNER CONTROL

Improved finished surfaces and reduced cycle times by optimized acceleration/deceleration when machining corners.

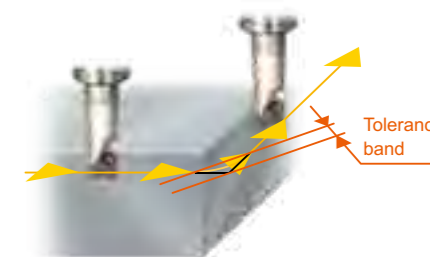

### Other Systems

Move to the next command position after reaching current command position.

### SMOOTH CORNER CONTROL

Move to next command position within tolerance band

## THERMAL SHIELD

The THERMAL SHIELD is an automatic compensation for room temperature changes, which realizes enhanced continuous machining accuracy. MAZAK has performed extensive testing in a variety of temperature-controlled environments and has used the results to develop a control system that compensates automatically for temperature changes in the machining area. Changes in the room temperature and compensation data are shown visually.

Temperature and compensation are displayed on screen. Operator can adjust compensation by looking at the data.

# Ease of operation

## Ease of setup

### Tool magazine operation panel

The tool magazine operation panel is designed for increased ease of operation. Instead of incorporating just a forward/reverse button for indexing the tool magazine and manually positioning the desired tool pocket, the pocket number or tool number can be input into the operation panel numeric keyboard and the desired pocket will be brought into position automatically.

## SAFETY SHIELD

When an operator manually moves the machine axes for setup, tool measurement or changing inserts, the CNC shows a synchronized 3D model on the display for checking machine interference. If any machine interference occurs, the machine motion automatically stops. This function also is active during automatic operation.

## MAZAK VOICE ADVISOR

Verbal support for the machine setup and safe conditions confirmation

# Ease of operation

## SAFETY SHIELD

Position misalignment and incline of the rotary axes can be measured and compensated automatically to realize high-accuracy 5-axis machining. The centers of rotation of both the C and B axes can be measured and compensated automatically.

▼ Measurement item selection

▼ Measurement information setting

▼ Automatic measurement program generation

Convenient screen display assists measurement operation.

## PERFORMANCE SPINDLE

The INTELLIGENT PERFORMANCE SPINDLE uses sensors housed in the spindle to monitor a variety of properties, including temperature, and provide useful information to the operator. This monitoring minimizes production loss caused by machine down time.

▲ Condition check  
Temperature as well as the motor load can be displayed

▲ Running recorder  
Operation status of milling spindle (rpm, % motor load and temperature) can be recorded for up to one year

## MAINTENANCE SUPPORT

Useful information for improved preventive maintenance to eliminate unexpected machine downtime

# MAZATROL Smooth CNC

The seventh generation MAZATROL CNC system – the core of SMOOTH TECHNOLOGY

## MAZATROL *SMOOTHX*

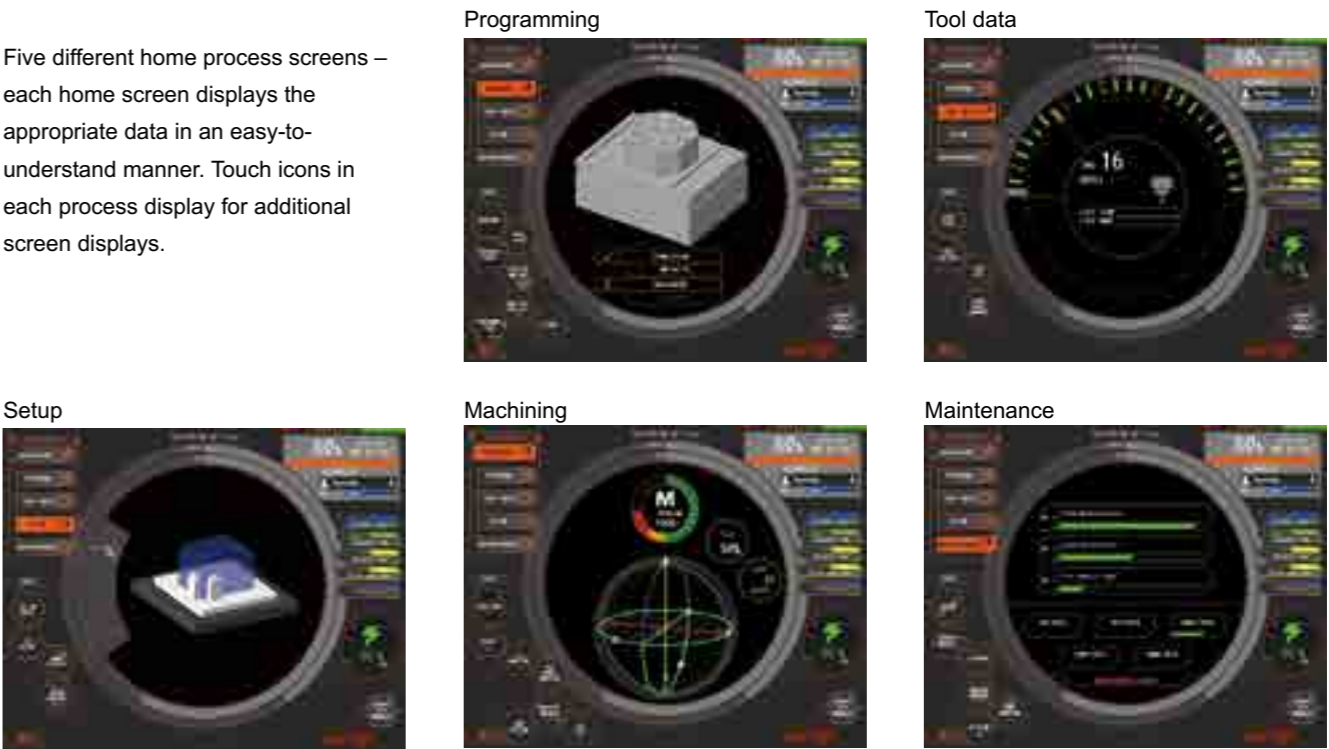

From setup to machining – designed for unsurpassed ease of operation

New interface with touch operation ensures convenient data processing – programming, confirmation, editing and tool data registration

### Process home screens

Five different home process screens – each home screen displays the appropriate data in an easy-to-understand manner. Touch icons in each process display for additional screen displays.

### Process home screens

Values and items can be input/selected easily on pop-up windows.

# Ease of Programming

## Visible programming screen

### QUICK EIA

Program, process list and 3D tool path display are linked to each other. Visible search on touch screen can reduce the time for program checking.

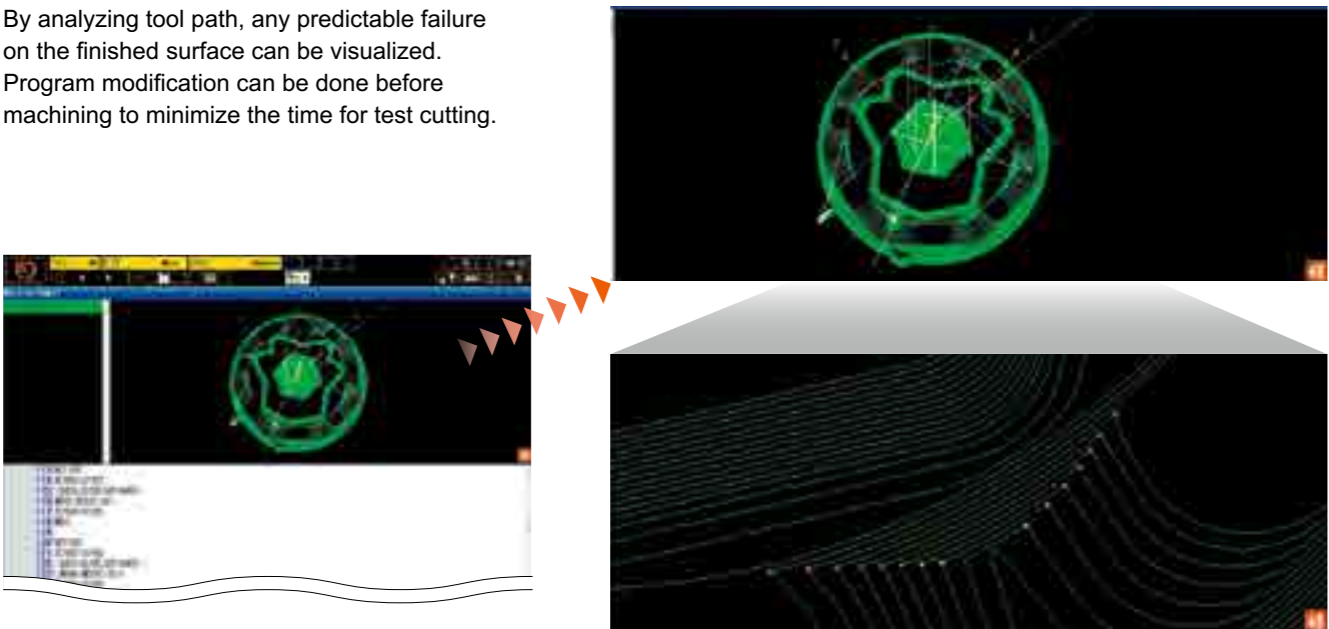

Selecting tool path by touching the screen

Moving to the corresponding EIA program line

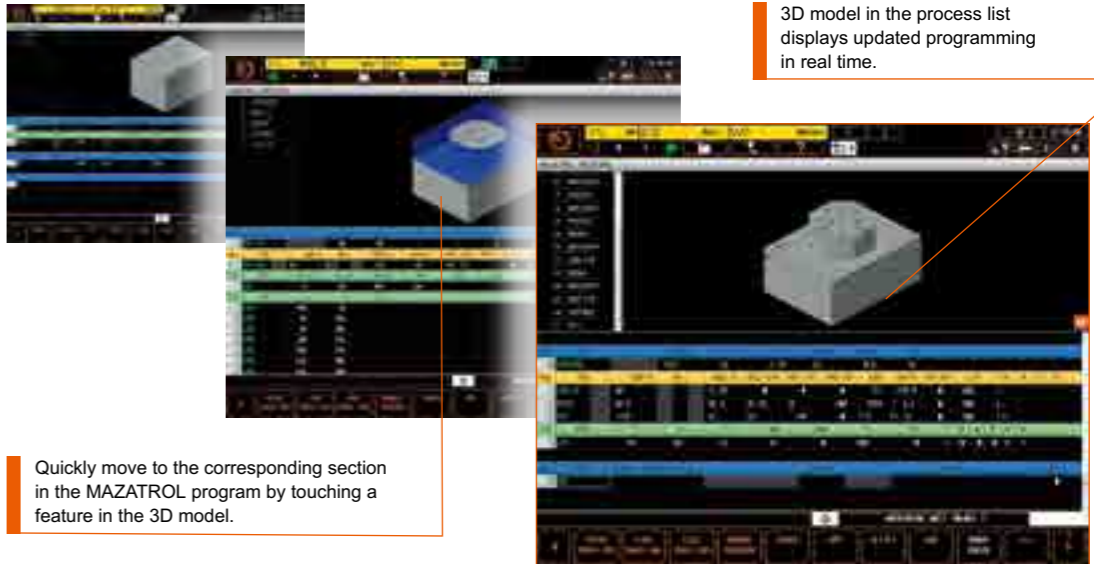

### VIEW SURF

By analyzing tool path, any predictable failure on the finished surface can be visualized. Program modification can be done before machining to minimize the time for test cutting.

### QUICK MAZATROL

MAZATROL program, unit list and 3D workpiece shape are linked to each other. After defining a machining unit in a MAZATROL program, the 3D shape is displayed immediately to check for any programming error easily and quickly.

3D model in the process list displays updated programming in real time.

Quickly move to the corresponding section in the MAZATROL program by touching a feature in the 3D model.

### 3D ASSIST

Workpiece and coordinate data can be imported from 3D CAD data to a MAZATROL program. No coordinate value inputs are required. This can reduce input errors and time for program checking.

CAD model importing

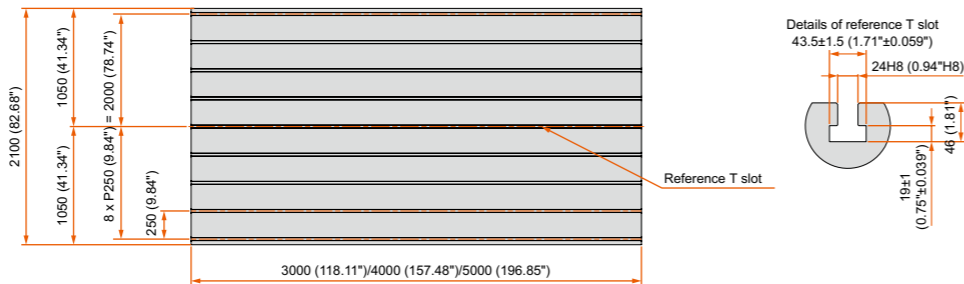

Shape selection

Automatic input to MAZATROL program

	Angle attachment (coolant through spindle)	○	○	○	○	○	○
	Snout attachment (gear reduction 1/4)	○	○	○	○	○	○
	Snout attachment (gear reduction 1/1)	○	○	○	○	○	○
	Universal attachment changer (1, 2, 4, 6)	○	○	○	○	○	○
	Automatic power on/off + warm-up operation	●	●	●	●	●	●
	Operation end buzzer	○	○	○	○	○	○
	3-color machine status light	○	○	○	○	○	○
	Status light (machining completion indicator/yellow) (alarm indicator/red)	○	○	○	○	○	○
	Ball screw core cooling (X, Y, Z axis)	●	●	●	●	○	○
	Ball screw core cooling (Y, Z axis)	○	○	○	○	●	●
High accuracy	Scale feedback (X, Y, Z, W axis)	○	○	○	○	○	○
	Scale feedback (W axis)	○	○	○	○	○	○
	Coolant temperature control	○	○	○	○	○	○
Setup support	Auto tool length measurement and tool breakage detection	○	○	○	○	○	○
	Mazak monitoring system B (RMP60)	○	○	○	○	○	○
	Magazine operation panel for tool ID (touch panel)	○	○	○	○	○	○
	Pull stud with tool ID (#50 EUCHNER)	○	○	○	○	○	○
	Manual pulse generator (wireless)	○	○	○	○	○	○
	Manual pulse generator (wired)	○	○	○	○	○	○
	Work light	●	●	●	●	●	●
Coolant/ Chip disposal	Flood coolant	●	●	●	●	●	●
	Work air blast	○	○	○	○	○	○
	Coolant through spindle system (1.5 Mpa [220 PSI] or 3.5 Mpa [510 PSI])	○	○	○	○	○	○
	Side coolant cover	●	●	●	●	●	●
	Internal chip conveyor (hard type)	○	○	○	○	○	○
	Internal chip conveyor	●	●	●	●	●	●
	Chip conveyor (right side discharge or left side discharge) (ConSep)	○	○	○	○	○	○
	Chip bucket (rotary or fixed)	○	○	○	○	○	○
	Large capacity chip bucket (rotary)	○	○	○	○	○	○
	Chip conveyor (right side discharge or left side discharge) (ConSep)	○	○	○	○	○	○
Safety equipment	Operator door interlock	●	●	●	●	●	●
Others	Manuals	●	●	●	●	●	●
	Additional manuals	○	○	○	○	○	○
	Disassembly and adjustment tools	●	●	●	●	●	●

Above specifications are for North American market.  
Standard and optional equipment vary by market.
